

SLA Report

- i) Go to SNOW
- ii) Left hand side click reports → view/run → Group
- iii) click on Cognizant Web production - Weekly Incidents
- iv) click on  → we will find 8 groups { web prodⁿ Support, Hedgemoney Support, PMS Support, Cognizant Enterprise, IAM AuthO Support, EUD systems addition, Salesforce (FDC), Sentinel IT } → change created b/n date.
ex: starting date & current date (27th or 31st)
- v) click on numbers → export → Excel (.xlsx) → downloaded
- vi) After opening the excel sheet downloaded copy the all the incident numbers
- vii) open SNOW → reports → group → Monthly Incident SLA Report
- 8)  → choose field → numbers is Paste all the incidents and Run
- 9) once it is generated download & export → Excel (.xlsx)
- 10) open downloaded SLA report & remove Short description, Status, assignment group from excel sheet
- 11) Create two new columns one is Actual elapsed time in hours after Actual elapsed time & another one is Actual time left in hours after the actual time left column.
- 12) We have formulas to convert it into hrs.

$$\text{Actual has elapsed} = E2 / (60 \times 60)$$

$$\text{Actual time} = (G2 / (60 \times 60))$$
- 13) Just copy paste this formula in respective columns to convert it into hrs.
- 14) Separate via priorities
- 15) Create another sheet called P2
- 16) Filter the priorities  → select priority → select only P2 resolution
- 17) copy & paste it in P2 resolution sheet

18) We have formula i.e for SLA Breached
L) $= \text{IF}(F2 > 4, "Yes", "No")$ { P2 Resolution }

19) Copy this formula & paste it in P2 Resolution $\rightarrow$ Has breached column

20) If it has breached then we have to check which team is breached. (Yes or No)

21) P2 Resolution time is 4 hrs

22) Copy the Incident number if it is breached

23) Check it in SNOW. (Copy paste the incident number)

24) Create another sheet P2 Breached & copy the breached ^{number} incident from P2 resolution & paste in P2 Breached sheet beside another column write Breached during SMOccall.

25) Now come to original downloaded sheet & again filter for Priority 3 Resolutions. Copy paste the & all data into another P3 Resolution Sheet.

Use the formula P3 Resolution $= \text{IF}(F2 > 4.8, "Yes", "No")$

Copy paste this formula in Has breached column right click on bottom

26) Create another sheet & name it Has P3 Resolution Unique. Copy paste data from P3 resolution sheet to P3 resolution unique sheet & filter the remove the duplicates. Choose numbers

27) Filter for SLA Breached Yes. Copy all the breached incidents numbers. Create new sheet P3 Resolution Br

28) After creating P3 resollⁿ Br create Create column called owner.

29) Copy one Incident & analyse it in Snow then see the timings & team which has breached & mention this name in owner column for that particular incident. If web team support team

30) Do it same for P4 Resolutions. give reason.

$= \text{IF}(F2 > 96, "Yes", "No")$

31) Create P3 response sheet.

32) From page 1 filter SLA assignment group column $\rightarrow$ Select only our 8 teams, copy & paste the data in P3 response.

33) Use formula P3 response = $\boxed{\text{IF}(F2 > 4, "YES", "No")}$ to check breached or Not.

34) Create P3 response Unique Sheet, copy paste all data from P3 response sheet & remove duplicate incidents $\rightarrow$ Apply filter & select breached has Yes.

35) ~~Same for~~ P3 response Br we have any SLA's breached then create another sheet P3 response Br & create owner column ~~& incidents~~.
(Copy paste incident numbers that has Breached)

36) Same for P4 Response

formula, $\boxed{P4 \text{ Response} = \text{If}(F2 > 24, "Yes", "No")}$

$\Rightarrow$ Generally we don't get breached in response.

$\rightarrow$ P3 response procedures

i) create P3 response & copy paste from Page 1 only Priority 3 Response.

ii) open initial page 1 & apply filters for all headers.

iii) Select Priority 3 Response in SLA column

iv) Select only our 8 groups i.e (Cognizant enterprise Services, ~~ITMS Prod Support~~, EUD, Hedgermony, IAM autho Support, PINS, SFDC, Sentinel ZT & Web product Support) from SLA assignment group.

v) ~~Copy paste these details in~~ create

Copy paste this in P3 response page

vi) again create P3 response Unique Sheet & copy paste only unique incident numbers & again filter with has breached if Yes the copy paste it in P3 response Br sheet
Same procedure for P4 response.

P2 Resolⁿ → 4 hrs

P3 Resolⁿ → 36 hrs Business hrs - ~~4 days~~ 4 days

P3 Response → (4 Business hrs) - < 1 day

P4 Resolⁿ → (72 Business hrs) - 8 days

P4 Response → (24 Business hrs) - 1 day

For P3 & P4 we need to Scroll down & check the

base. Rajat said → 9 hrs = 1 day ∴ 72 hrs = 8 days

25 to 27 → Initial Report send it to venish

1st of next month after 11:30 am generate report from

1 - 31 → Initial Report
